

# Android Stuff

## Customization

### Delete System Apps

Works without root:

```
adb shell
pm uninstall -k --user 0 [app]
```

Example [app] = net.oneplus.launcher

```
adb shell
su
mount -o rw,remount /system
rm -rf /system/app/myApp.apk
rm -rf /data/data/com.example.myapp
mount -o ro,remount /system
exit
exit
```

Maybe this works:

```
adb shell rm /system/app/MyApp*
adb uninstall org.my.app
```

## Commands

### Get device MAC

```
adb devices | tail -n 2 | head -n 1 | awk '{print $1}'
```
